

Igor Ferreira

AI Product Manager · Technical Product Manager

igor.ferreira@fohat.com.br · linkedin.com/in/figor · paesferreira.com.br · Brazil · Remote / Hybrid · Open to international

SUMMARY

Passionate about product development and innovation, with an engineer's analytical depth and a founder's business sense. 19 years building products end-to-end across heavy industry and B2B software: 7 years at Volvo growing from engineer to product leader; 8 years founding and building B2B platforms in Brazil's regulated energy market; now shipping multi-agent AI products that run autonomously in production on GCP — from discovery and strategy to production code.

EXPERIENCE

AI Systems Builder — Fohat eTech · eXmesh

2024 — 2025

- Designed and shipped eXmesh, a multi-agent AI mesh in production on GCP: MUTHUR (chat-activated orchestrator), Bishop (strategy-ops: reads ADRs/BRS/SPECs, detects architectural drift), Walter (surgical executor) and 4 Synthetic Workers (headless infra monitors, one per squad).
- Walter performed the company's first fully autonomous PR merge in production — receives task openers, runs tests, opens PRs and self-declares ready for merge.
- Governance Gateway enforcing OKRs and Mandates on every agent dispatch, with human-in-the-loop preserved; observability with Langfuse; 6 MCP servers as in-cluster tool interface.

Innovation Board Advisor — OSINOVA Participações

2022 — 2024

- Member of the Board of Advisors: corporate governance and management advisory, bringing combined traditional-corporate and startup experience to guide company strategy.

Founder · Platform Builder — Beenx · eTradeflow · eFlowing (Fohat group)

2018 — 2023

- Built energy marketplace, ETRM trading terminal (eTradeflow), agentic CRM for free-energy-market migration (eFlowing) and blockchain settlement — from zero to production, used by real energy trading companies.
- Every feature shipped under ANEEL regulation and CCEE compliance, serving traders in Brazil's free energy market.

Founder — Fohat Corporation

2018

- Founded a holding to operate B2B platforms in regulated markets: energy, fintech, blockchain.

Engineer → Product Leader — Volvo do Brasil

2010 — 2017

- 7 years in heavy industry, growing from engineering to product leadership in one of Brazil's most demanding environments.

R&D Internship (Stuttgart) · International Internship (China) — Bosch

2007

- Industrial automation at scale in China; systems engineering in Bosch's R&D labs in Stuttgart.

SKILLS

AI / Agents	LangGraph · Claude (Anthropic) · Claude Agent SDK · Vertex AI · Langfuse · MCP · HITL
Cloud / Infra	GCP (GKE, Cloud Run, Cloud SQL, GCS) · Kubernetes · ArgoCD (GitOps) · Redis / Memorystore
Software	Python · TypeScript · Next.js · NestJS · GraphQL · Django · React · PostgreSQL · WebSockets
Domain	Energy trading (ETRM) · Mercado Livre de Energia · ANEEL / CCEE compliance · Renewable energy & microgrids · Blockchain settlement

EDUCATION

B.Sc. Industrial Electrical Engineering, Electrotechnics — UTFPR (Federal University of Technology – Paraná), 2011
Postgraduate Specialization in Renewable Energy (360h) — UTFPR, 2016–2017 · Capstone: microgrids as integration of distributed photovoltaic generation
MBA, Brazilian Electric Sector — ISAE/FGV (FGV Management), 2016–2018 · coursework and capstone (TCC) completed; program not concluded
Innovation Board Member Certification — Gonew.Community, 2021–2022
